

ZAFARI Easter Egg Painting DIY Guide

MATERIALS:

- Eggs
- Needle
- Egg Painter, alternatively a small stick
- Paint
- Feathers, beads or any other decorative accessories

! Make sure you create your Painted Easter Egg together with an adult !

1. Carefully poke two holes in an egg with a needle, one at the top and one at the bottom of the egg. Be careful the egg does not crack.
2. Take one end of the egg and blow until the inside of the egg falls out from the opposite end. Make sure the holes are not too small and it can also help to take the needle and stir it around inside the egg to make sure the egg yolk is punctured. Make sure all the egg is out and run some water through the egg.
3. Make sure the egg is completely dry before starting to paint it.
4. Place the egg carefully in an egg painter or alternatively place it on a small stick so it is easier to paint, and you do not have to hold it in your hand.
5. Paint your Easter egg as you wish in the colours you like – we are making ZAFARI eggs in the colours of the characters!
6. Leave until dry.
7. Glue feathers or other decorative materials like beads or string on the egg and decorate your home with them when they are dry or hide them outside for your friends to find on an Easter Egg Hunt!

HAVE FUN & HAPPY EASTER!
